SUMMARY

Aspiring Software Developer and Computer Science (Data Science) student with solid programming skills in Java, Python, and C. Strong problem-solving abilities with a focus on solving real-world challenges through clean, efficient code. Experienced in using Git for version control and interested in developing scalable software solutions while continuously improving technical expertise.

TECHNICAL SKILLS

- Java, Python, C, SQL, Cloud Computing (Fundamentals), Git, Problem Solving

PROJECTS

1. AI-Powered Plant Disease Detection, Severity & Progression Analysis System

Tech Stack: Python, TensorFlow Lite, CNN, FastAPI, React, HTML, CSS, Render

- Developed a full-stack AI-powered web application to detect plant diseases from leaf images using a CNN-based deep learning model.
- Implemented disease severity estimation and future progression risk prediction to provide actionable plant health insights.
- Built a FastAPI backend and React frontend supporting image upload and live camera capture for both mobile and desktop users.
- Deployed the end-to-end solution on the cloud, enabling real-time predictions through a publicly accessible web platform.

2. Smart Parking Management System

Tech Stack: Python, DBMS

- Designed and developed a database-driven parking management system for efficient vehicle tracking and parking slot allocation.
- Implemented vehicle entry, exit, and parking availability management using structured database operations.
- Automated parking record maintenance to improve operational efficiency and reduce manual intervention.
- Applied DBMS concepts to ensure reliable data storage, retrieval, and management of parking information.

3. Python Quiz Project

Tech Stack: Python

- Built an interactive quiz application with automated answer validation and real-time score calculation.
- Developed a structured question management system to support multiple quiz scenarios and user interactions.
- Implemented performance evaluation features to provide instant feedback and results to users.
- Applied core Python programming concepts including functions, loops, conditional statements, and data structures.

4. Smart Page Replacement Visualizer

Tech Stack: HTML, CSS, JavaScript, Chart.js

- Developed an interactive web-based tool to visualise Operating System page replacement algorithms through real-time simulations.
- Implemented dynamic memory state tracking and algorithm execution to simplify complex OS concepts.
- Integrated Chart.js for graphical comparison of page faults and algorithm performance metrics.
- Designed a responsive and user-friendly interface to enhance learning and analysis of memory management techniques.

EDUCATION

Bachelor of Technology in Computer Science & Engineering

Aug 2024 - Present

Gokaraju Rangaraju Institute of Engineering and Technology

- CGPA: 9.17 CGPA
- Actively developing skills in software development, data science, cloud computing, and artificial intelligence through hands-on learning and certified programs.
- AWS Academy Graduate in Cloud Foundations and Data Engineering.
- Completed AI-ML Virtual Internship supported by Google for Developers and India Edu Program.
- Earned Cisco Networking Academy - C Essentials certification.
- Completed Java Full Stack with ReactJS and AI national-level short-term program (Brainovision Solutions India).
- Participated in NHETIS'25 National Hackathon, shortlisted among the Top 60 teams out of 240+, working on a FinTech-based solution using emerging technologies.

Secondary School of Education

Mar 2022 - 2024

Vinjee Junior College

- Grade: 97.8%

Central Board of Secondary Education

Mar 2021 - 2022

Gitanjali Group of Schools

- Grade: 91.2%

LICENSES & CERTIFICATIONS

- HTML Essentials - Cisco Networking Academy
- C Essentials 1 - Cisco Networking Academy
- AWS Academy Graduate - Cloud Foundations - Amazon Web Services
- AWS Academy Graduate - Data Engineering - Amazon Web Services
- AWS Cloud Virtual Internship - EduSkills Academy (AICTE)
- Google AI-ML Virtual Internship - Google
- Google Cloud Computing Foundations Certificate - Google Cloud
- Build a Secure Google Cloud Network - Google Cloud Skill Badge
- Implement Load Balancing on Compute Engine - Google Cloud Skill Badge
- Prepare Data for ML APIs on Google Cloud - Google Cloud Skill Badge
- Set Up an App Development Environment on Google Cloud - Google Cloud Skill Badge
- Programming in Java - NPTEL

ACHIEVEMENTS

- Shortlisted among Top 60 teams at NHETIS’25 National Hackathon (out of 240+ teams) for a FinTech-based project, gaining hands-on experience in problem-solving, rapid prototyping, and teamwork. A thrilling journey of innovation and real-world impact.
- Shotput Competition - Secured Silver Medal, showcasing strength, determination, and competitive spirit.
- District-Level Throwball Competition - Recognised by Sports Authority of Telangana State and Olympic Association of Telangana, highlighting teamwork and athletic excellence.
- Intra Throwball Competition (UNNATI) - Won Gold Medal, demonstrating leadership, collaboration, and dedication on the field.

VOLUNTEER EXPERIENCE

Corporate Relations, Computer Society of India, Student Chapter at Gokaraju Rangaraju Institute of Engineering and Technology.

- Built and maintained strong relationships with industry experts, alumni, and sponsors to support club growth.
- Collaborated with organisations to organise workshops, guest talks, and sponsorships.
- Enhanced the club’s visibility by connecting with reputed companies and professionals.
- Secured mentorships, sponsorships, and resources to strengthen club initiatives.
- Strategically developed impactful partnerships benefiting both students and the organisation.
